Re: Order Requiring Installation of Measuring Devices for diversions discharging water to the Timberdome Canal. Dated October 12, 2001.

Norman C. Young, Administrator:

Pursuant to item number two of the order, I am submitting my plans for measuring devices and controlling works.

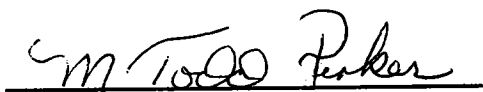

### Water Rights 34-7122A and 34-7035A

These water rights points of diversion will be measured with a Pipe Orifice with a vertical plastic tube elbowed at 90 degree angle with a small gate valve located at the center line of the discharge pipe. Control works will be a butterfly valve at the pump head.

### Water Rights 34-7096A, 34-7097A and 34-7223

These water rights are exchanged with surface rights from the Big Lost River. They will be measured coming from the Moore Canal of the Big Lost River Irrigation District across a weir. The control works will be a screw gate.

I feel that I have or will comply with the Order before the beginning of the 2002 irrigation season.

M. Todd Perkes
